Hi Wayne, when sending to my management chain (Brigid) could you also include Schatzi Fitz-James her deputy who just came back from a detail? Thanks

Subject: Hunters Point Naval Shipyard Site: Request for Consultation

Greg –

At the Hunters Point Naval Shipyard site in San Francisco, CA, the Navy has requested that the RESRAD BUILD computer program be used to evaluate the protectiveness of radiological remediation goals adopted for contaminated buildings at the site. The Navy has provided a report describing the results of an evaluation using the RESRAD code, along with a number of supporting files. We have begun to evaluate the Navy submittal, working with ERT staff, our contractor, and Stuart Walker in OSRTI. As a first step in our evaluation, we are working to determine whether the Navy submittal is complete.

EPA's June 2014 Radiation Q&A guidance calls for consultation with HQ in cases where the use of guidance or approaches developed by other agencies is being considered. RESRAD BUILD was developed by DOE and is the Navy's preferred evaluation tool. We would like to begin the consultation process on the use of the RESRAD code and would appreciate guidance on how to proceed. Thanks.
